Number of Pages: 104

Abstract: This publication presents a set of statistical data pertaining to characteristics of family income for small areas within Maryland. Data for the report were derived from both the 1960 and 1970 Census of Population and Housing.

The report provides a basic framework for the examination of family income trends and distribution at the election district level in addition to trends for cities and towns in the State having a population of 2,500 persons or more in 1970. Maps showing percentage of families below the poverty level and percentage change in median family income from 1959 to 1969 are included in the report in order to assist in the identification of small areas in Maryland with significant social and economic problems.

This report was developed in anticipation of a demand for fundamental information pertaining to various aspects of income distribution in Maryland. This effort represents another basic step in providing the planning community in Maryland with a comprehensive data base.

DEPUTY SECRETARY

April 15, 1972

The Honorable Marvin Mandel
Governor
The State House
Annapolis, Maryland 21404

Dear Governor Mandel:

I am pleased to transmit the enclosed report entitled "Maryland Family Income Characteristics: 1970 Census." This report was undertaken to provide information about the income of families in Maryland, and is part of a series of reports prepared by the Department using data from the 1970 Census of Population and Housing.

The report includes family income distributions for the State, counties and election districts of Maryland for 1969. In addition, median family income is displayed for each of the aforementioned geographic areas. In order to examine trends and geographic patterns, maps of the State and counties showing percentage change in median family income from 1959 to 1969 and percentage of families below the poverty level are presented.

The income data presented in the report will provide an important addition to a data base being developed by the Department, and as such should provide a useful tool for program planning on the part of both State and local agencies. This data base should also be of interest to private institutions and agencies. Copies of this report are being distributed throughout the State.

Sincerely,

Vladimir Wahbe

INTRODUCTION

One of the most widely used sets of information collected by the Bureau of the Census is the family income data. These statistics form an integral part of the data base required for the administration of both State and local programs and also provide a basis for the identification and analysis of Maryland's socioeconomic problems at both the State and local levels. With this in mind, the Department of State Planning has retrieved and assembled the family income data contained in this report in a format suitable to meet these needs.

FAMILY INCOME DISTRIBUTION

Tables included in this report display the family income distributions that have been retrieved from the 1970 Census of Population and Housing Fourth Count Summary Tapes. It should be noted that the question pertaining to family income appeared on only 20 percent of the questionnaires distributed by the Bureau of the Census. The sample responses were aggregated into fifteen income categories and multiplied by a Census-derived factor to represent the entire population. In this report, several of the original categories have been collapsed, so that a more general, but readily useable family income distribution could be presented in tabular form.

Family income is the combined income of all members of a family. Income is the dollar amount of money received as wages, salaries, farm and nonfarm self-employment earnings, social security or railroad retirement payments and public assistance or welfare payments. Additional sources of income include: "interest; dividends; veterans payments of all kinds; retirement pensions from private employers, unions, and

governmental agencies; and other regular payments such as net rental income, unemployment insurance benefits, workmen's compensation, private welfare payments, alimony or child support, Armed Forces allotments and regular contributions from persons not members of the household. [The Census definition] excludes receipts from sale of personal property, capital gains, lump-sum insurance or inheritance payments, or payments in 'kind'."*

Family income should be clearly differentiated from income of unrelated individuals, the latter category pertaining to persons living alone or with other persons not related to him. Since according to the 1970 Census approximately 90 percent of Maryland's population lived in families, it was felt that family income distributions would be most representative of income patterns throughout the State.

GEOGRAPHIC AREAS

The income data are presented by minor civil divisions, i.e., geographic areas used by the Bureau of the Census, which with few exceptions correspond to election districts in Maryland. A deviation from political boundaries was necessary in Baltimore City, since the Bureau of the Census did not collect or tabulate data by election ward. In place of wards, the City has been broken into Regional Planning Districts (RPD's), a set of relatively homogeneous geographic units developed by aggregating census tracts. All incorporated cities, towns and unincorporated places with a population of 2,500 or more persons are also included in the family income tabulations.

* U.S. Bureau of the Census, 1970 Census, 1970 CENSUS USERS' GUIDE. Vol. I, U.S. Government Printing Office, Washington, D.C., 1970, P. 108.

POVERTY LEVEL

Two maps accompany each set of State and county tables. The first map, "Percent of Families Below the Poverty Level," is based on a poverty index adopted by the Bureau of the Census. The poverty level is determined by several criteria including income, family size, and urban versus rural residence. The minimum income level required for a family to be classified as being above the poverty level increases according to family size. The index also makes some allowance for the fact that it is generally more expensive to live in urban areas than rural areas. For example, a nonfarm family of four persons with a male head was considered as being below the poverty level if the family's income was less than $3,745 in 1969. A poverty level of $3,197 was assigned to a similar family residing on a farm. The following table contains the 1969 poverty level thresholds used by the Bureau of the Census.

1969 Poverty Level Thresholds, by Size of Family and Sex of Head, by Farm and Nonfarm Residence*

Size of family	Total	Nonfarm			Farm		
		Total	Male head	Female head	Total	Male head	Female head
All unrelated individuals..	$1,834	$1,840	$1,923	$1,792	$1,569	$1,607	$1,512
Under 65 years.....	1,888	1,893	1,974	1,826	1,641	1,678	1,552
65 years and over.....	1,749	1,757	1,773	1,751	1,498	1,508	1,487
All families.....	3,388	3,410	3,451	3,082	2,954	2,965	2,757
2 persons.....	2,364	2,383	2,394	2,320	2,012	2,017	1,931
Head under 65 years....	2,441	2,458	2,473	2,373	2,093	2,100	1,984
Head 65 years and over.	2,194	2,215	2,217	2,202	1,882	1,883	1,861
3 persons.....	2,905	2,924	2,937	2,830	2,480	2,485	2,395
4 persons.....	3,721	3,743	3,745	3,725	3,195	3,197	3,159

6 persons.....	4,921	4,958	4,962	4,917	4,244	4,245	4,205
7 or more persons.....	6,034	6,101	6,116	5,952	5,182	5,185	5,129

* U.S. Bureau of the Census, Census of Population: 1970 GENERAL SOCIAL AND ECONOMIC CHARACTERISTICS. Final Report PC(1). App-30.

MEDIAN FAMILY INCOME

The second map, showing "Percent Change in Median Family Income, 1959-1969" by minor civil division, uses data from both the 1960 and 1970 Census of Population and Housing. For comparability, 1959 median family income has been adjusted to 1969 real dollars, using the National Consumer Price Index.

Median income for 1969, as shown in the report, is calculated using a linear interpolation of the original fifteen income categories. The median family income for an area is the amount which divides the families into two equal groups, half having incomes above the median value and half of the families having an income below the median figure.
